

Project Fact Sheet

Project Title	Preparation of Project Design Document of Hulas Steel Industries Ltd.
Project Period	From May 2008 to September 2011
Donor	Hulas Steel Industries
Project Background	<p>Hulas Steel Industries Ltd. (HSIL) is one of the manufacturers of cold rolled sheet, roofing sheet, pipe fittings, steel pipes, steel structures and poles under the umbrella of Golchha Organization Group. The factory of HSIL is located in Simra VDC, Bara District, Nepal. In the galvanizing furnace and hot air generators for colour coating process HSIL has been using fossil fuel. HSIL has installed environment friendly rice husk based gasification system to generate producer gas.</p> <p>HSIL had already developed PIN and assigned Winrock International to develop Project Design Document (PDD) in order to develop this as a CDM project for carbon credit either for voluntary market or compliance market.</p>
Projective Objective	The objective of the project was to develop PDD of HSIL for carbon credit.
Activities/Components	<ul style="list-style-type: none"> • Collected necessary information and calculated GHG emissions reduction from the project. • Collected necessary information from HSIL for preparation of PDD • Prepare the PDD and present it in the stakeholder meeting, technical committee meeting, steering committee meeting and stakeholders consultation at project site and incorporated the comments to finalize PDD. • Facilitated HSIL for host country approval • .
Accomplishments	PDD was prepared and was approved by DNA
